Electronics Installations

Be your vessel new or old, it's likely to have at least some electronics installed. If you have a problem that cannot be solved with the normal test procedure, although you will have been advised to the contrary, the **ONLY** economical and permanent way to cure it, is to return any faulty or suspect units to the relevant manufacturer for servicing, effectively deleting the "middleman". On such occasions, the returned and repaired unit will carry a limited manufacturers warranty. We can advise on the suitability of new equipment, diagnose and advise on your problems, and remove /reinstall equipment. If you need new additions or updates we'll be happy to assist. Sea trials are available by appointment.
